

Software Configuration and Management Status Report

Date: [Current Date]

Project: [Project Name]

Team: [Team Name]

Configuration Items (CIs) Status:

- CI 1: [Status]
 - Description: [Brief description of CI 1 and its current status]
- CI 2: [Status]
 - Description: [Brief description of CI 2 and its current status]
- CI 3: [Status]
 - Description: [Brief description of CI 3 and its current status]
- [Add more CIs and their respective statuses as necessary]

Change Requests (CRs):

- Open CRs: [Number of open CRs]
 - Closed CRs: [Number of closed CRs]
 - CRs under review: [Number of CRs currently under review]
- [Provide additional details about notable CRs if applicable]

Releases:

- Latest release: [Version number and date of the latest release]
 - Description: [Summary of changes and improvements in the latest release]
 - Upcoming release: [Version number and estimated release date]
 - Description: [Brief overview of features and enhancements planned for the upcoming release]
- [Include any other relevant information regarding releases]

Version Control:

- Source code repository: [Name of the repository]
 - Total commits: [Total number of commits]
 - Active branches: [Number of active branches]
 - Merge requests: [Number of open merge requests]
- [Provide additional details about version control activities]

Quality Assurance:

- Test coverage: [Percentage of code covered by automated tests]
 - Bugs reported: [Number of bugs reported and their severity levels]
 - Test plan execution: [Summary of test plan execution status]
- [Add any other pertinent information related to quality assurance]

Risks and Issues:

- Open risks: [Number of open risks]
- [Description of each open risk and its current status]
- Open issues: [Number of open issues]

- [Description of each open issue and its current status]
- [Include any notable risks or issues and their impact on the project]

Next Steps:

- [Outline the upcoming tasks and activities to be completed]
- [Specify any dependencies or milestones]
- [Identify responsible team members or stakeholders]

Conclusion:

- [Summarize the overall status of the software configuration and management activities]
- [Highlight any major achievements, challenges, or concerns]
